CSE - Academic Year 2026-27

Java Programming – Lab (Batch 2025-29)

Lab Assignment No:- 16

Name of Student	Abobakr mohamed elameen
PRN No.	25070122015
Batch	2025-29
Class	Programming with JAVA
Academic Year & Semester	2nd Year – 3rd sem
Title of Assignment	Write a Java program to create and handle a user-defined exception.
Practice questions	1. Create a Voting System that throws a custom exception if age is below 18.

```
class UnderAgeException extends Exception {
    UnderAgeException(String message) {
        super(message);
    }
}

public class VotingSystemDemo {

    static void checkVotingEligibility(int age) throws
UnderAgeException {
        if (age < 18) {
            throw new UnderAgeException("Age " + age + " is below
the voting age of 18");
        }
        System.out.println("Eligible to vote");
    }

    public static void main(String[] args) {
        try {
            checkVotingEligibility(16);
        } catch (UnderAgeException e) {
            System.out.println("Voting denied: " + e.getMessage());
        }
    }
```

```
}
```

2. Create a Driving License System that throws a custom exception if the user's age is below 18. If the age is valid, display that the user is eligible for a driving license.

```
class UnderAgeException extends Exception {
    UnderAgeException(String message) {
        super(message);
    }
}

public class DrivingLicenseSystemDemo {

    static void checkLicenseEligibility(int age) throws
UnderAgeException {
        if (age < 18) {
            throw new UnderAgeException("Age " + age + " is below
the required age of 18");
        }
        System.out.println("Eligible for a driving license");
    }

    public static void main(String[] args) {
        try {
            checkLicenseEligibility(20);
        } catch (UnderAgeException e) {
            System.out.println("License denied: " + e.getMessage());
        }
    }
}
```

Output

1)

```
bb324a9029103fc22\redhat.java\jdt_ws\JAVA_PRACTICALS_eabe1187\bi
P_16.VotingSystemDemo'
Voting denied: Age 16 is below the voting age of 18
PS C:\Users\abell\OneDrive\Desktop\JAVA_PRACTICALS>
```

2)

```
4136d8ec875b8bb324a9029103fc22\redhat.java\jdt_ws\JAVA_PR
16.DrivingLicenseSystemDemo'
Eligible for a driving license
PS C:\Users\abell\OneDrive\Desktop\JAVA_PRACTICALS>
```

Conclusion	Custom exceptions let a program raise errors that are meaningful to its own business logic, rather than relying only on Java's built-in exception types. By extending `Exception` and providing a descriptive message, custom exceptions make validation failures — like an invalid age for voting or licensing — easier to identify, handle, and debug.
